

Handling charges typically cover packaging, label generation, custom boxes and any administrative or labor etc. needed to assemble a carrier ready package.

In the past these charges have been standardized regardless of size or configuration and have been listed and billed separately.

For yours and our convenience we now use an algorithm that determines these costs and allocates the appropriate cost per item.

This cost is no longer shown as a separate line item, rather it is included in the shipping charge on you invoice.

Thanks for choosing capsandgauges.com
